A Slow Death: 83 Days of Radiation Sickness. A Slow Death. : Vertical, 2008 - Social Science - 141 pages. 0 Reviews. Japan's worst nuclear radiation accident took place at a uranium reprocessing facility in Tokaimura, northeast of Tokyo, on 30 September 1999. The direct cause of the accident was cited as the depositing of a uranyl nitrate solution--containing about 16.6 kg of uranium, which exceeded the critical mass--into a precipitation tank.

A Slow Death: 83 Days of Radiation Sickness - Google Books

A Slow Death: 83 Days of Radiation Sickness. There is a book on this tragic case titled "A Slow Death: 83 Days of Radiation Sickness" where "Hisashi Ouchi" has been called "Hiroshi Ouchi." This book documents the 83 days of treatment after the incident until he passed away.

Hisashi Ouchi - The Victim Of Worst Nuclear Accident In

After being treated for a week, Ouchi managed to say, "I can't take it anymore! I am not a guinea pig!". However, the doctors kept treating him and taking measures to keep him alive, which only ensured a very slow and very painful death. After 83 days of struggle, Ouchi died of multiple organ failure on December 21, 1999.

Hisashi Ouchi, the Victim of Fatal Radiation Kept Alive

This is a book about a man named Ouchi whose chromosomes were destroyed by a blast of neutron rays while working in unsafe conditions in a uranium processing facility. For 83 days, a crack team of doctors, nurses, and medical experts from several countries try to keep him alive.

Japan's worst nuclear radiation accident took place at a uranium reprocessing facility in Tokaimura, northeast of Tokyo, on 30 September 1999. The direct cause of the accident was cited as the depositing of a uranyl nitrate solution--containing about 16.6 kg of uranium, which exceeded the critical mass--into a precipitation tank. Three workers were exposed to extreme doses of radiation. Hiroshi Ouchi, one of these workers, was transferred to the University of Tokyo Hospital Emergency Room, three days after the accident. Dr. Maekawa and his staff initially thought that Ouchi looked relatively well for a person exposed to such radiation levels. He could talk, and only his right hand was a little swollen with redness. However, his condition gradually weakened as the radioactivity broke down the chromosomes in his cells. The doctors were at a loss as to what to do. There were very few precedents and proven medical treatments for the victims of radiation poisoning. Less than 20 nuclear accidents had occurred in the world to that point, and most of those happened 30 years ago. This book documents the following 83 days of treatment until his passing, with detailed descriptions and explanations of the radiation poisoning.

The extraordinary #1 New York Times bestseller about the ability of books to feed the soul even in the darkest of times. Nominated as one of America's best-loved novels by PBS's The Great American Read. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist--books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of I Am the Messenger, has given us one of the most enduring stories of our time. "The kind of book that can be life-changing." "The New York Times "Deserves a place on the same shelf with The Diary of a Young Girl by Anne Frank." "USA Today DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

This series provides texts central to medieval studies courses and focuses upon the diverse cultural, social and political conditions that affected the functioning of all levels of medieval society. Translations are accompanied by introductory and explanatory material and each volume includes a comprehensive guide to the sources' interpretation, including discussion of critical linguistic problems and an assessment of recent research on the topics covered. From 1348 to 1350 Europe was devastated by an epidemic that left between a third and one half of the population dead. This source book traces, through contemporary writings, the calamitous impact of the Black Death in Europe, with a particular emphasis on its spread across England from 1348 to 1349. Rosemary Horrox surveys contemporary attempts to explain the plague, which was universally regarded as an expression of divine vengeance for the sins of humankind. Moralists all had their particular targets for criticism. However, this emphasis on divine chastisement did not preclude attempts to explain the plague in medical or scientific terms. Also, there was a widespread belief that human agencies had been involved, and such scapegoats as foreigners, the poor and Jews were all accused of poisoning wells. The final section of the book charts the social and psychological impact of the plague, and its effect on the late-medieval economy.

During the late 18th and early 19th centuries, there was a tubercular 'moment' in which perceptions of the consumptive disease became inextricably tied to contemporary concepts of beauty, playing out in the clothing fashions of the day. With the ravages of the illness widely regarded as conferring beauty on the sufferer, it became commonplace to regard tuberculosis as a positive affliction, one to be emulated in both beauty practices and dress. While medical writers of the time believed that the fashionable way of life of many women actually rendered them susceptible to the disease, Carolyn A. Day investigates the deliberate and widespread flouting of admonitions against these fashion practices in the pursuit of beauty. Through an exploration of contemporary social trends and medical advice revealed in medical writing, literature and personal papers, Consumptive Chic uncovers the intimate relationship between fashionable women's clothing, and medical understandings of the illness. Illustrated with over 40 full color fashion plates, caricatures, medical images, and photographs of original garments, this is a compelling story of the intimate relationship between the body, beauty, and disease - and the rise of 'tubercular chic'.

The murdered Mexican singer's husband shares his recollections and memories of their relationship, both personal and professional, and clarifies certain misconceptions about her life and death.

In less than a year, Neil Peart lost both his 19-year-old daughter, Selena, and his wife, Jackie. Faced with overwhelming sadness and isolated from the world in his home on the lake, Peart was left without direction. That lack of direction lead him on a 5

"Will the tiger be menacing; will the ocean be threatening; will the island be something out of Frankenstein or will it be an Eden?"Yann Martel Life of Pi, first published in 2002, became an international bestseller and remains one of the most extraordinary and popular works of contemporary fiction. In 2005 an international competition was held to find the perfect artist to illustrate Yann Martel's Man Booker Prize-winning novel. From thousands of entrants, Croatian artist Tomislav Torjanac was chosen. This lavishly produced edition features forty of Torjanac's beautiful four-color illustrations, bringing Life of Pi to splendid, eye-popping life. Tomislav Torjanac says of his illustrations: "My vision of the illustrated edition of Life of Pi is based on paintings from a first person's perspective--Pi's perspective. The interpretation of what Pi sees is intermeshed with what he feels and it is shown through [the] use of colors, perspective, symbols, hand gestures, etc."

25th Anniversary Edition Over 3 Million Copies Sold 'I couldn't give this book a higher recommendation' BILLY CONNOLLY Written by the Buddhist meditation master and popular international speaker Sogyal Rinpoche, this highly acclaimed book clarifies the majestic vision of life and death that underlies the Tibetan Buddhist tradition. It includes not only a lucid, inspiring and complete introduction to the practice of meditation, but also advice on how to care for the dying with love and compassion, and how to bring them help of a spiritual kind. But there is much more besides in this classic work, which was written to inspire all who read it to begin the journey to enlightenment and so become 'servants of peace'.

Fallen Angels by Walter Dean Myers is a young adult novel about seventeen-year-old Richie Perry, a Harlem teenager who volunteers for the Army when unable to afford college and is sent to fight in the Vietnam War. Perry and his platoon--Peewee, Lobel, Johnson, and Brunner--come face-to-face with the Vietcong, the harsh realities of war, and some dark truths about themselves. A thoughtful young man with a gift for writing and love of basketball, Perry learns to navigate among fellow soldiers under tremendous stress and struggles with his own fear as he sees things he'll never forget: the filling of body bags, the deaths of civilians and soldier friends, the effects of claymore mines, the fires of Napalm, and jungle diseases like Nam Rot. Available as an e-book for the first time on the 25th anniversary of its publication, Fallen Angels has been called one of the best Vietnam War books ever and one of the great coming-of-age Vietnam War stories. Filled with unforgettable characters, not least Peewee Gates of Chicago who copes with war by relying on wisecracks and dark humor, Fallen Angels "reaches deep into the minds of soldiers" and makes "readers feel they are there, deep in the heart of war." Fallen Angels has won numerous awards and honors, including the Coretta Scott King Award, an ALA Best Book for Young Adults, a Booklist Editors Choice, and a School Library Journal Best Book. Fallen Angels was #16 on the American Library Association's list of the most frequently challenged books of 1990-2000 for its realistic depiction of war and those who fight in wars.
