A projective personality test, the house-tree-person test requires the test taker to draw a house, a tree and a person 3. The test is then used as a measure of self-perception, outlook and sometimes brain damage. Interpretations of the test are subjective, and based loosely on a set of basic principles.

You will not know if he/she

**An Overview of Projective Personality Measures**

The Draw-A-Person test requires the subject to draw a person. The results are based on a psychodynamic interpretation of the details of the drawing, such as the size, shape and complexity of the facial features, clothing and background of the figure. As with other projective tests, the approach has very little demonstrated validity and there is evidence that therapists may attribute pathology ...

**Projective test - Wikipedia**

Oster's book "Using Projective Drawings in Clinical Practice" is also outstanding and has some fascinating alternate drawing approaches, my favorite being the "Draw-A-Person In the Rain" technique. I also like Cantlay's "Detecting Child Abuse", and Malchiodi's work on drawings of children of domestic violence.
