10 Fonts For Architects | ArchDaily

Words can have an enormous effect on people and can act to cajole, persuade or offend. Some might argue that font styles are equally as important, as the shape of the letters and how light or dark they are can also have a strong effect upon the reader. Architectural lettering refers to a font designed for architects or inspired by architecture.

This is a list of post-nominal letters used in the United Kingdom after a person's name in order to indicate their positions, qualifications, memberships, or other status. There are various established orders for giving these, e.g. from the Ministry of Justice, Debrett's and A & C Black's Titles and Forms of Address, which are generally in close agreement; this order is followed in the list.

The rise and fall of identical copies: digital technologies and form-making from mass customization to mass collaboration. Digital technologies have changed architecture—the way it is taught, practiced, managed, and regulated. But if the digital has created a “paradigm shift” for architecture, which paradigm is shifting? In *The Alphabet and the Algorithm*, Mario Carpo points to one key practice of modernity: the making of identical copies. Carpo highlights two examples of identity crucial to the shaping of architectural modernity: in the fifteenth century, Leon Battista Alberti's invention of architectural design, according to which a building is an identical copy of the architect's design; and, in the nineteenth and twentieth centuries, the mass production of identical copies from mechanical master models, matrixes, imprints, or molds. The modern power of the identical, Carpo argues, came to an end with the rise of digital technologies. Everything digital is variable. In architecture, this means the end of notational limitations, of mechanical standardization, and of the Albertian, authorial way of building by design. Charting the rise and fall of the paradigm of identity, Carpo compares new forms of postindustrial digital craftsmanship to hand-making and the cultures and technologies of variations that existed before the coming of machine-made, identical copies. Carpo reviews the unfolding of digitally based design and construction from the early 1990s to the present, and suggests a new agenda for architecture in an age of variable objects and of generic and participatory authorship.

ARCHITECTURAL DRAFTING AND DESIGN, 6E is the classic text for all architectural drafters and CAD operators, whether beginning, intermediate, or advanced. This full-color, comprehensive edition provides the basics of residential design, using various types of projects that a designer or architect is likely to complete during the actual design process and is written to meet the most recent editions of IRC and IBC. This book begins with information on architectural styles that have dominated the field over the last four centuries, followed by basic design components related to the site and structure. Commercial drafting, basic materials used for construction, common construction methods and drawings typically associated with commercial construction are all covered. An important feature of this best-seller is its step-by-step instructions for the design and layout of each type of drawing associated with a complete set of architectural plans, with projects that can be completed using either CAD or manual drawing methods. Readers will gain the knowledge needed to complete the drawings required by most municipalities to obtain a building permit for a single-family residence. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

content on programming, project management, construction contract administration, risk management, and ethics; and coverage of small firm considerations as well as emerging issues such as integrated practice and integrated project delivery."--Jacket.

Dear Architecture brings together a collection of the most powerful letters submitted to the Dear Architecture Competition, hosted by Blank Space in 2015. Dear Architecture is an ideas competition that challenged designers to explore one of the most important communication tools of all time - the letter. With entries submitted from over 60 countries around the world - the open letters challenge architects and designers to think deeply about the profession they are participating in. With a special cover designed by Irena Gajic, this book includes the three winning entries, and 12 honorable mentions to the competition, as well as a selection of additional noteworthy entries.

Condemned Building is one of our most requested out-of-print books, so we've done a special limited edition reprint (only 750 copies) to meet the ongoing demand for this book. Not long after this book was published, the only one on the work of this gifted architect and delineator, Doug died of leukemia. Fans and friends, including legions of students, quickly bought up the remaining copies, and the difficulty of finding this book has undoubtedly only increased its appeal. Doug said that these projects were "the underbelly of canonical architectural principles and forms", and indeed many are dark, brooding, or sexual in nature: a "kamasutra with the negative." The book covers ten projects, in model, drawing, and "psychoanalytical" text. Douglas Darden taught at Harvard, Columbia, and most recently the University of Colorado at Denver. He was a Fellow of the American Academy in Rome. He is sorely missed, but we're happy to be able to offer his book once again.
