This book seeks to both showcase and further develop innovative research and debates on contemporary Arab cultural production. Popular culture in the form of cinema, popular music, literature, visual media and cyber-cultures, both local and imported, enjoy a central role in Arab cultural life, and the contributors to this innovative collection showcase the tremendous cultural output emerging from the Arab world.

They present sensitive, conceptual readings whilst remaining mindful of the place of this work within a wider framework that seeks to prevent isolationist readings of cultural phenomena. Making sense of the place of culture in the Arab world, and agreeing upon a broadly recognisable and commonly accepted set of terms within which to discuss this output, is a new and urgent challenge. Arab Cultural Studies aspires to understand, communicate and theorise these forms. This book was originally published as a special issue of the Journal for Cultural Research.

This book constitutes the proceedings of the 7th International Conference on Wireless and Satellite Services, WiSATS 2015, held in Bradford, UK, in July 2015. The conference was formerly known as the International Conference on Personal Satellite Services (PSATS) mainly covering topics in the satellite domain. As the scope of the conference widened to include wireless systems, the conference was renamed to WiSATS. The 29 revised papers were presented at the conference in three technical sessions and one special session on "Network Coding for Satellites". WiSATS 2015 also hosted two workshops along with the main conference: The first workshop, Communication Applications in Smart Grid (CASG 2015), focused on the merging area of using communication technology within the electricity power grid for smart monitoring and control. The second workshop, Advanced Next-Generation Broadband Satellite Systems (BSS 2015), focused on the use of satellite systems for providing next-generation broadband services.

This state-of-the art guide offers an in-depth treatment of the elements and components that comprise satellite communication systems. The book takes the reader step-by-step through the principles and methods of system design - all in easy-to-understand language avoiding long mathematical derivations.

This volume contains revised and extended research articles written by prominent researchers participating in ICFWI 2011 conference. The 2011 International Conference on Future Wireless Networks and Information Systems (ICFWI 2011) has been held on November 30 ~ December 1, 2011, Macao, China. Topics covered include Wireless Information Networks, Wireless Networking Technologies, Mobile Software and Services, intelligent computing, network management, power engineering, control engineering, Signal and Image Processing, Machine Learning, Control Systems and Applications, The book will offer the states of arts of tremendous advances in Wireless Networks and Information Systems and also serve as an excellent reference work for researchers and graduate students working on Wireless Networks and Information Systems.

This is the second report, previous report published July 2002 (ISBN 9211261473).

Offers a new insight into the Iraqi media during Saddam Hussein's rule and the post-2003 era. The arguments put forth are based on content analysis of TV newscasts, participant observation, questionnaires distributed to Iraqi journalists and interviews with Iraqi media experts.

What are the ideal roles the mass media should play as an institution to strengthen democratic governance and thus bolster human development? Under what conditions do media systems succeed or fail to meet these objectives? And what strategic reforms would close the gap between the democratic promise and performance of media systems? Working within the notion of the democratic public sphere, 'Public Sentinel: News Media and Governance Reform' emphasizes the institutional or collective roles of the news media as watchdogs over the powerful, as agenda setters calling attention to social needs in natural and human-caused disasters and humanitarian crises, and as gatekeepers incorporating a diverse and balanced range of political perspectives and social actors. Each is vital to making democratic governance work in an effective, transparent, inclusive, and accountable manner. The capacity of media systems and thus individual reporters embedded within those institutions to fulfill these roles is constrained by the broader context of the journalistic profession, the market, and ultimately the state. Successive chapters apply these arguments to countries and regions worldwide. This study brought together a wide range of international experts under the auspices of the Communication for Governance and Accountability Program (CommGAP) at the World Bank and the Joan Shorenstein Center on the Press, Politics and Public Policy at Harvard University. The book is designed for policy makers and media professionals working within the international development community, national governments, and grassroots organizations, and for journalists, democratic activists, and scholars engaged in understanding mass communications, democratic governance, and development.

IMAGE (Imager for Magnetopause-to-Aurora Global Exploration) is the first NASA MIDEX mission and the first mission dedicated to imaging the Earth's magnetosphere. This volume offers detailed descriptions of the IMAGE instrumentation and of the image inversion techniques used to interpret the data. Also included are chapters on the IMAGE science objectives, the spacecraft design and capabilities, science and mission operations, and the processing and distribution of IMAGE's nonproprietary data products.
