This guide highlights the place of translation in our culture, encouraging awareness of the process of translating and the choices involved, making the translator more 'visible'. Concentrating on major writers and works, it covers translations out of many languages, from Greek to Hungarian, Korean to Turkish. For some works (e.g. Virgil's Aeneid) which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available.

This volume invites scholars of the Catholic and Protestant Reformations to incorporate recent advances in transnational and transregional history into their own field of research, as it seeks to unravel how cross-border movements shaped reformations in early modern Europe. Covering a geographical space that ranges from Scandinavia to Spain and from England to Hungary, the chapters in this volume apply a transregional perspective to a vast array of topics, such as the history of theological discussion, knowledge transfer, pastoral care, visual allegory, ecclesiastical organization, confessional relations, religious exile, and university politics. The volume starts by showing in a first part how transfer and exchange beyond territorial circumscriptions or proto-national identifications shaped many sixteenth-century reformations. The second part of this volume is devoted to the acceleration of cultural transfer that resulted from the newly-invented printing press, by translation as well as transmission of texts and images. The third and final part of this volume examines the importance of mobility and migration in causing transregional reformations. Focusing on the process of 'crossing borders' in peripheries and borderlands, all chapters contribute to the de-centering of religious reform in early modern Europe. Rather than princes and urban governments steering religion, the early modern reformations emerge as events shaped by authors and translators, publishers and booksellers, students and professors, exiles and refugees, and clergy and (female) members of religious orders crossing borders in Europe, a continent composed of fractured states and regions.

Translation has been a crucial process in world culture over the past two millennia and more. In the English-speaking cultures many of the most important texts are translations, from Homer to Beckett, the Bible to Freud. Although recent years have seen a boom in translation studies, there has been no comprehensive yet convenient guide to this essential element of literature in English. Written by eminent scholars from many countries, the Oxford Guide to Literature in English Translation meets this need and will be essential reading for all students of English and comparative literature. It highlights the place of translation in our culture, encouraging awareness of the issues raised, making the translator more visible. Concentrating on major writers and works, it covers translations out of many languages, from Greek to Korean, from Swahili to Russian. For some works (e.g. Virgil's Aeneid) which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available. The Guide is divided into two parts. Part I contains substantial essays on theoretical questions, a pioneering outline of the history of translation into English, and discussions of the problems raised by specific types of text (e.g. poetry, oralliterature). The second, much longer, part consists of entries grouped by language of origin; some are devoted to individual texts (e.g. the Thousand and One Nights) or writers (e.g. Ibsen, Proust), but the majority offer a critical overview of a genre (e.g. Chinese poetry, Spanish Golden Age drama) or of a national literature (e.g. Hungarian, Scottish Gaelic). There is a selective bibliography for each entry and an index of authors and translators.

In a major new translation of the Qur'an, the sacred text of Islam, the meaning and spirit of the original are retained while providing clear text that is free of the archaisms, incoherence, and alien structures of existing translations.

Drawing on ten years of research on the unpublished Wittgenstein papers, Stern investigates what motivated Wittgenstein's philosophical writing and casts

new light on the *Tractatus* and *Philosophical Investigations*. The book is an exposition of Wittgenstein's early conception of the nature of representation and how his later revision and criticism of that work led to a radically different way of looking at mind and language. It also explains how the unpublished manuscripts and typescripts were put together and why they often provide better evidence of the development of his ideas than can be found in his published writing. In doing so, the book traces the development of a number of central themes in Wittgenstein's philosophy, including his conception of philosophical method, the picture theory of meaning, the limits of language, the application of language to experience, his treatment of private language, and what he called the "flow of life." Arguing that Wittgenstein's views are often much more simple (and more radical) than we have been led to believe, *Wittgenstein on Mind and Language* provides an overview of the development of Wittgenstein's philosophy and brings to light aspects of his philosophy that have been almost universally neglected.

An investigation of the multiple meanings and functions of sacrifice in diverse religious texts and practices from the late Hellenistic and Roman imperial periods.

Our vast and often neglected literature of poetic translation is represented in this anthology by some 600 poems or extracts. The choice encompasses many languages, including the Hebrew of the Bible, the Greek of Homer, the Latin of Virgil and Ovid, Persian, French, German, Russian, Italian, Anglo-Saxon, Icelandic, Irish, and the American Indian, all rendered into English.

Assertions belong to the family of speech acts that make claims regarding how things are. They include statements, avowals, reports, expressed judgments, and testimonies - acts which are relevant across a host of issues not only in philosophy of language and linguistics but also in subdisciplines such as epistemology, metaphysics, philosophy of mind, ethics, and social and political philosophy. Over the past two decades, the amount of scholarship investigating the speech act of assertion has increased dramatically, and the scope of such research has also grown. The *Oxford Handbook of Assertion* explores various dimensions of the act of assertion: its nature; its place in a theory of speech acts, and in semantics and meta-semantics; its role in epistemology; and the various social, political, and ethical dimensions of the act. Essays from leading theorists situate assertion in relation to other types of speech acts, exploring the connection between assertions and other phenomena of interest not only to philosophers but also to linguists, psychologists, anthropologists, lawyers, computer scientists, and theorists from communication studies.

"WITTGENSTEIN'S CONCEPTION OF PHILOSOPHY" was first published in 1969 by Basil Blackwell Publishers, the official publisher of Wittgenstein's works. It was intended to be a clear and concise introduction to Wittgenstein's whole philosophy that corrects many basic misunderstandings of Wittgenstein at the time. After all these years, many scholars still regard it as the best introduction to Wittgenstein. We are reprinting this book and making it available electronically. In addition, we are appending here the author's "last words" on Wittgenstein: "BEYOND MARX AND WITTGENSTEIN: A Confession of a Wittgensteinian Marxist Turned Taoist", a talk given in an international symposium on "Marx and Wittgenstein" held at Trinity College, Cambridge, UK, in 1999 and later published as the concluding chapter of the book: "MARX AND WITTGENSTEIN: KNOWLEDGE, MORALITY AND POLITICS", edited by Gavin Kitchen and Nigel Pleasants, published by Routledge, 2002.
