Principles of Weaving.  
Weaving is very simple. You essentially have two sets of threads - one set, pre-wound, called the warp, running vertically and kept under tension, and the other set threaded individually through the vertical threads, usually at right angles, called the weft.

Weaving is defined as a  
Process of textile  
production in which two  
different sets of yarns or  
threads are interlaced or  
meshed with right angles and  
thus form a fabric or cloth.  
The lengthwise threads are  
called the warp and the  
widthwise threads are called  
weft or filling. The fabric

## Fabric Manufacturing

Different weaving techniques include the basic plain weave, the double-toned basket weave or binakul, and the multi-heddle weave (binetwagan or tinumballitan), among others. Among the complicated one is the brocade weave or pinilian, which uses sticks inserted on selected warp threads to create designs that float on the threads.
