You may know the 212 degree concept for our original bestseller 212

The Extra Degree written by Sam Parker and Mac Anderson. But this book is written specifically for businesses and is all about creating a service culture. In case you are not familiar with the 212 concept, here it is in a nutshell: At 211 degrees water is hot. At 212 degrees, it boils. And with boiling water, comes steam. And steam can power a locomotive. The one extra degree makes the difference. This simple analogy reflects the ultimate definition of excellence. Because it's the one extra degree of effort, in business and life, that can separate the good from the great. The stories in 212 Service reflect real-life examples of companies that have taken their customer service to the next degree. Someone once said, "Life is like a game of tennis. The player who serves well seldom loses." The same can be said for any business on the planet. There are many books written about service, however, our goals in this one is to keep it simple. 212 Service presents 10 simple, but engaging rules of service that can be read by every member of your team in less than 30 minutes. 212 Service is written with real life examples of exceptional customer service and is certain to inspire your team with ideas that apply specifically to your industry.

If you believe that the latest blockbuster medication is worth a premium price over your generic brand, or that doctors have access to all the information they need about a drug's safety and effectiveness each time they write a prescription, Dr. Jerry Avorn has some sobering news. Drawing on more than twenty-five years of patient care, teaching, and research at Harvard Medical School, he shares his firsthand experience of the wide gap in our knowledge of the effectiveness of one medication as compared to another. In *Powerful Medicines*, he reminds us that every pill we take represents a delicate compromise between the promise of healing, the risk of side effects, and an increasingly daunting price. The stakes on each front grow higher every year as new drugs with impressive power, worrisome side effects, and troubling costs are introduced. This is a comprehensive behind-the-scenes look at issues that affect everyone: our shortage of data comparing the worth of similar drugs for the same condition; alarming lapses in the detection of lethal side effects; the underuse of life-saving medications; lavish marketing campaigns that influence what doctors prescribe; and the resulting upward spiral of costs that places vital drugs beyond the reach of many Americans. In this engagingly written book, Dr. Avorn asks questions that will interest every consumer: How can a product judged safe by the Food and Drug Administration turn out to have unexpectedly lethal side effects? Why has the nation's drug bill been growing at nearly 20 percent per year? How can physicians and patients pick the best medication in its class? How do doctors actually make their prescribing decisions, and why do those decisions sometimes go wrong? Why do so many Americans suffer preventable illnesses and deaths that proper drug use could have averted? How can the nation gain control over its escalating drug budget without resorting to rationing or draconian governmental controls? Using clinical case histories taken from his own work as a

practitioner, researcher, and advocate, Dr. Avorn demonstrates the impressive power of the well-conceived prescription as well as the debacles that can result when medications are misused. He describes an innovative program that employs the pharmaceutical industry's own marketing techniques to reduce use of some of the most overprescribed and overpriced products. *Powerful Medicines* offers timely and practical advice on how the nation can improve its drug-approval process, and how patients can work with doctors to make sure their prescriptions are safe, effective, and as affordable as possible. This is a passionate and provocative call for action as well as a compelling work of clear-headed science.

The term "Peak Oil" was born in January 2001 when Colin Campbell formed the Association for the Study of Peak Oil & Gas (ASPO). Now, Peak Oil is used thousands of times a day by journalists, politicians, industry leaders, economists, scientists and countless others around the globe. Peak Oil is not the end of oil but it tells us the end is in sight. Anyone interested in food production, economic growth, climate change or global security needs to understand this new reality. In *Peeking at Peak Oil* Professor Kjell Aleklett, President of ASPO International and head of the world's leading research group on Peak Oil, describes the decade-long journey of Peak Oil from extremist fringe theory to today's accepted fact: Global oil production is entering terminal decline. He explains everything you need to know about Peak Oil and its world-changing consequences from an insider's perspective. In simple steps, Kjell tells us how oil is formed, discovered and produced. He uses science to reveal the errors and deceit of national and international oil authorities, companies and governments too terrified to admit the truth. He describes his personal involvement in the intrigues of the past decade. What happens when a handful of giant oil fields containing two thirds of our planet's oil become depleted? Will major oil consumers such as the EU and US face rationing within a decade? Will oil producing nations conserve their own oil when they realize that no one can export oil to them in the future? Does Peak Oil mean Peak Economic Growth? If you want to know the real story about energy today and what the future has in store, then you need to be "Peeking at Peak Oil".

Lou Lit is the international literary magazine at Louisburg College in rural Northeastern North Carolina. The focus of Lou Lit is on place-based works of experience. At the same time, the content featured in Lou Lit solely reflects the artistry of its contributors and is not
