I begin this lesson by communicating with students that analyzing data in the form of graphs, charts, maps, etc. is essential to understanding informational text. I project my flipchart showing a series of graphs, charts, timelines, and maps (see resource). I stop each page to discuss how the visuals embedded in text helps explain the text.

Provide each small group with a chart, table, or tally chart showing data that could be represented with bar graphs, pictographs, and line graphs. Have each member of each small group create a different type of graph. After everyone in a group is finished, the members of the group should compare and contrast their data displays.
